

STREAMLINING IT PROCUREMENT: AUTOMATING STANDARD LAPTOP ORDERS WITH FLOW DESIGNER

PHASE 7 – PROJECT DOCUMENTATION

7.1 Introduction

The project documentation phase records the implemented Standard Laptop procurement automation process in ServiceNow. It provides a structured summary of the project purpose, components, workflow, testing and final outcome.

7.2 Project Overview

The project streamlines the procurement of standard laptops by using ServiceNow Service Catalog and Flow Designer. A user submits a Standard Laptop request, the request passes through the required approval process, and the approved request is processed automatically through the fulfillment workflow.

7.3 System Components

Component	Purpose
Service Catalog	Provides the Standard Laptop request.
Requested Item	Represents the submitted laptop request.
Approval	Controls the approval stage of the request.
Flow Designer	Automates the workflow after approval.
Catalog Task	Represents the laptop fulfillment activity.
Hardware Team	Handles the assigned fulfillment task.

7.4 Implemented Workflow

The implemented workflow follows the sequence below:

- Standard Laptop Request
- Approval
- Flow Designer Automation
- Catalog Task Creation
- Hardware Team Assignment
- Laptop Configuration

7.5 Testing Documentation

The project was tested by verifying the major stages of the procurement workflow. Testing covers request submission, approval, Flow Designer execution, Catalog Task creation and assignment of the task to the Hardware team.

7.6 Project Configuration Summary

The project configuration consists of the Standard Laptop request in the Service Catalog, the required approval process, Flow Designer automation, Catalog Task creation and Hardware team assignment. These components are connected to ensure that an approved laptop request moves automatically into the fulfillment stage.

7.7 Project Outcome

The completed project provides an automated Standard Laptop procurement workflow in ServiceNow. The process connects the request, approval and fulfillment stages and reduces the need for manual task creation and assignment.

7.8 Documentation Summary

The project documentation records the complete Standard Laptop procurement automation process, from the initial request through approval and automated fulfillment. The documented workflow provides a clear reference for the implemented ServiceNow solution and its expected operation.
