

STREAMLINING IT PROCUREMENT: AUTOMATING STANDARD LAPTOP ORDERS WITH FLOW DESIGNER

PHASE 8 – PROJECT DEMONSTRATION

8.1 Introduction

The project demonstration phase presents the completed Standard Laptop procurement automation in ServiceNow. The demonstration explains the purpose of the project and shows how a Standard Laptop request is submitted, approved and processed through Flow Designer. It also demonstrates the automatic creation of the Catalog Task and its assignment to the Hardware team as the final fulfillment stage.

8.2 Demonstration Objectives

- Introduce the project and its purpose.
- Explain the Standard Laptop procurement workflow.
- Demonstrate the request and approval process.
- Show the Flow Designer automation.
- Demonstrate Catalog Task creation and Hardware team assignment.
- Present the final output of the project.

8.3 Demonstration Sequence

Step	Demonstration Activity
1	Introduce the project name and purpose.
2	Explain the need for automating Standard Laptop procurement.
3	Open the Service Catalog and show the Standard Laptop request.
4	Submit the Standard Laptop request.
5	Show the Requested Item and approval stage.
6	Show the Flow Designer workflow used for automation.
7	Show the automatically created Catalog Task.
8	Show the Catalog Task assigned to the Hardware team.
9	Explain the final procurement workflow and outcome.

8.4 Project Benefits

- Reduces manual task creation after approval.
- Provides a structured procurement workflow.
- Automates the transition from approval to fulfillment.
- Ensures the fulfillment task reaches the Hardware team.
- Improves consistency and visibility of the procurement process.

8.5 Demonstration Video

The project demonstration will be recorded with screen sharing and voice-over. The video will introduce the project name and purpose, explain the need for automating Standard Laptop procurement, demonstrate the request and approval process, show the Flow Designer workflow, and display the automatically created Catalog Task assigned to the Hardware team. The final output and project benefits will also be explained. The completed video will be uploaded to Google Drive with access enabled for the required viewers.

8.6 Final Demonstration Outcome

The demonstration will show the complete Standard Laptop procurement workflow from request submission through approval, Flow Designer automation, Catalog Task creation and Hardware team assignment. This provides a clear presentation of the implemented ServiceNow solution.

8.7 Demonstration Summary

The demonstration presents the complete Standard Laptop procurement workflow in ServiceNow, from request submission and approval to Flow Designer automation and Catalog Task creation. It shows the assignment of the task to the Hardware team and the final fulfillment process. The demonstration confirms the working of the automated procurement solution and its expected outcome.
